DIAVITA WEIGHT LOSS SMART PROGRAM (WL)

Weight loss is often accompanied by the loss of not only fat but also muscle mass. With the intense stress of modern life, such loss is simply unacceptable. Obesity is related to the accumulation of excess adipose tissue and not muscle excess. Proper diet weight loss takes the form of fat reduction, not muscle loss. The WL Smart Program based on the Vita Energy solves this problem, as the cocktail consists of a protein that helps, on the one hand, to maintain muscle mass, while on the other hand curbs the feeling of hunger that often torments people when going on various diets.

"I have lost 19 lbs in 45 days and am currently at my goal weight. It truly is the best-tasting shake out there and I always look forward to using it to whip up new concoctions with my blender".

DIAVITA NUTRITIONIST RECOMMENDATION:

- The recommended frequency for taking Vita Energy for a noticeable effect: no less than 2 times a day
- The cocktail can be taken to replace a meal as well as in between meals
- After taking the cocktail, you should drink 1.5-2.0 liters of water during the day. This will help your body better absorb the healthy nutrients contained in the product
- Exercises twice a week for 40 min each are recommended during the program
